T-6A TEXAN II Systems Engineering Case Study - Derivative of PC-9 Pilatus Aircraft - JPATS Program, Training System, Hawker Beechcraft History (Paperback)

By U S Military, Department of Defense (Dod), Air Force Center Fo Systems Engineering

Independently Published, United States, 2017. Paperback. Condition: New. Language: English. Brand new Book. This is one of a series of systems engineering case studies prepared by the Air Force Center for Systems Engineering. This case study analyzes the T-6A Texan II, a derivative of a commercial aircraft, the PC-9, manufactured by Pilatus Aircraft, a company located in Switzerland. In addition to the United States Air Force, the primary users of the PC-9 are the Swiss Air Force, Royal Australian Air Force, Royal Saudi Air Force, Royal Thai Air Force, and Irish Air Corps. First flight of the PC-9 prototype occurred on May 7, 1984, with certification being obtained in September 1985. The Department of Defense is exponentially increasing the acquisition of joint complex systems that deliver needed capabilities demanded by our warfighter. Systems engineering is the technical and technical management process that focuses explicitly on delivering and sustaining robust, high-quality, affordable solutions. The Air Force leadership has collectively stated the need to mature a sound systems engineering process throughout the Air Force. Gaining an understanding of the past and distilling learning principles that are then shared with others through our formal education and practitioner support are critical to achieving continuous...
